

# THE HINDU

INDIA'S NATIONAL NEWSPAPER SINCE 1878

## Techny Chemistry

**T**echny Chemy was created with a vision "Novelty and adaptability" in the field of construction-chemicals. To this end Techny has been working relentlessly to demystify Construction Chemicals and creating products that are user-friendly, versatile and consistent in performance. Promoted by a team of technocrats headed by Mr.D.Ravi who has an experience of two decades in the field of construction chemicals industry and assisted by a team of eminent Polymer Chemists. Techny has in its fold a wide range of Construction chemicals for building protection, preservation, repair/rehabilitation and other support products all of which are building-friendly. Techny is now emerging as a big force providing end-to-end solution for the construction industry, from marketing to usage of construction chemicals, etc, in South India. The company has always been conscious about delivering quality products backed by timely and efficient service and also implementing the projects in a scientific and systematic way. It is worthwhile to note that Techny has a wide array of clients spread all over South India. Techny has a strong work force of nearly 150, who are result oriented, well-trained with best educational background and a high degree of motivation. Their range of products include

**Admixtures:** For every conceivable concrete situation.  
**Water proofing coatings:** Building friendly and user friendly coating systems tailored for specific areas of application.  
**Grouts:** Non-Shrink free flow grouts for industrial applications at varying strength options, Instant setting anchor grouts for a wide range of applications including re-bar anchoring, Polyester resin and Epoxy based special application grouts.  
**Anti-Corrosive Coatings:** For reinforcement rods, concrete and metal surfaces.  
**Protective and Decorative coatings:** Weatherproof, tough, durable and pleasing exterior finishes.  
**Repair Products:** Specially designed repair products for rehabilitation of dilapidated structures.  
**Epoxy Floorings:** Protective floor coatings, chemical resistant coatings, Self-leveling epoxy floorings and epoxy screed floorings.  
**Industrial Floorings:** Toppings that vastly improve abrasion resistance.  
**Surface Treatments:** Shutter releasing agents and curing compounds.  
**Tiling Aids:** Tile fixing mortars for various tile fixing jobs, colored tile joint grouts, epoxy tile joint grouts, tile cleaners and spacers.  
**Sealants:** Polysulphide sealant for expansion joints.  
 Besides offering smart prod-

ucts, Techny Tech Team offers Smart Solutions for water-proofing, building protection and industrial applications. Techny Tech Team also offers case-based rehabilitation packages, right from case study, testing, formulating and scheduling rehabilitation, and providing application support through its Trained Applicator Network. Techny believes that quality products must be followed up with the right application support. Therefore at Techny, Applicator training is an enduring process. Customer care at Techny is a long-term commitment. Techny's CRM cell is technically competent with at site know-how to provide adequate responses to all types of customer queries. Techny's quality surveillance envelopes every single activity from sourcing, purchase, production, sales, technical support and application support. All products are subject to a meticulous quality testing regime and the customer is assured of end products that are in line with latest industry standards. All the while Techny is aware of its environmental responsibility and so all the products are eco friendly. Techny has been awarded with ISO 9001:2008 certifications for quality in Design and Manufacture of construction chemicals and is in the process of obtaining ISO 14001 for Environmental Management systems.

**It's Reduces... Heat, A/C Consumption and Electricity Bills**
